Fabrizio Bertolami   February 2024

Personal Information

Name	Fabrizio
Surname	Bertolami
Address	
Mobile Phone	
E-Mail	
Nationality	Italian
Birth Date	August 7 1971

Language Skills

Italian	Mother Tongue
English	B2
Russian	A1

Technical Skills

Programming Languages	Java 5/6/7 Servlet/JSP, Struts, Trax, Spring Framework, FOP, HTML, XML,XSL, XSLT, Web Services, Javascript, SQL, Perl, IBM CTG, Ant, EJB 2/3,Mybatis, Hibernate, Junit, Maven, Android 4, Python, Docker, Powershell,Arduino Programming Language
IDEs	BeaWebLogic, Eclipse, NetBeans, WebSphere Studio, JBuilder, SOAPUI, MS Visual Studio, Arduino IDE
Database management / Knowledge management	Microsoft SQL Server 2005/2008, MySQL,Oracle 10/11/12, Teradata,DB2
Operative Systems	Microsoft Windows 95/98/ME/2k/xp/Windows 7,Windows 10, Linux Debian
Collaboration tools	Word, Excel, Publisher, Access, Internet Explorer, Mozilla Firefox, Atlassian JIRA/Confluence, Azure Devops
Metodologies	Waterfall, Agile Scrum , Kanban
Server	Apache HTTP Server, JBOSS, Jakarta Tomcat, IBM Websphere 5.0/6.1/7/9, Bea WebLogic 7.0
Development Tools	Filezilla, Putty, Telnet, Fork, DBeaver, SQLExplorer, Splunk
Version Control Software	CVS, SVN, Git

Networking skills	Medium

Professional experiences

From 10/2021 to date	IDM Consulting for Atlas Reply SPA

Role : Team Leader/Service Manager

Unicredit PSD2 APIs Third Party Providers Support, Incident Management and Reporting for all the eastern european countries, along with Germany, Austria and Italy. Automation of Reporting procedures and Splunk log analysis (in python and powershell). Reporting to Munich based director, team leader of the Service desk for PSD2 TPPs and coordinator for incident management among both backend, frontend and business teams.

Technologies: ServiceNow, BMC Remedy, Splunk, JSON, Python, Powershell,MS Office Suite

From 9/2020 to current	IDM Consulting Srl

Role: Delivery Manager, PMO

Project management of electronic invoicing system and document exchange between production units (file-sharing) for the Fincantieri Naval Group.

Activities are mainly aimed at the development and maintenance of IBM Filenet P8 Java components for both front-end and back-end features. IBM Application Software communicates with the customer's OCR system and with SAP via SOAP web services. Activities are managed using the Agile framework (scrum for Change Requests or new features and Kanban for AMS) through Microsoft Azure Devops platform, including Build and Continuous Integration Process. The code is checked on each build using GIT, Maven and SonarQube.

Project Management, development and maintenance of the exchange module for electronic invoicing from Telecom Italia Group to the Revenue Agency (SDI) via FTP for sending and receiving all Telecom Italia group invoices (about 11 million documents / month).

The main module has been developed using Java AKKA framework and a Consul Software Balancer is used to provide multiple instances of the module, providing scalability and self-healing features. Activities are managed using the Agile framework (scrum for Change Request and new implementations while Kanban is used for AMS) through Microsoft Azure Devops platform, including Build and Continuous Integration Process. The code is checked on each build using GIT, Maven and SonarQube.

Technologies: Microsoft Azure Devops, IBM FileNet, IBM Websphere, Java 1.7 e JavaScript (Dojo), Oracle DB 12g, Ant, Junit, Maven, SonarQube.

From 5/2021 to 10/2021	IDM Consulting for Blue Reply SPA

Role : Project Manager/Team Leader

Development and maintenance of the E-Commerce platform for LUXOTTICA group for North America (customization of the HCL-WCS platform). Coordination and management of three external groups, two of which located abroad (Brazil and Spain), aimed to develop new features. Development activities took place on Amazon AWS VMs. The activities included meetings in English with the teams, as well as coordination and reporting to the customer in the same way. Active support to testers during UAT and SIT along with application configuration, merge & Deploy on the Git repository, database updating and troubleshooting. If necessary, Java code development activities (backend) to support the team were performed. Tasks and bug management via Atlassian JIRA

Fabrizio Bertolami   February 2024

Technologies: Atlassian JIRA and Confluence, HCL WCS Web Commerce Platform, IBM Websphere, Java 1.8 , javascript, DB2, Ant, Junit, Maven, Eclipse, Fork, SOAPUI, QuickBuilder

From 2016 to 2020	TXT E-Solutions SPA

Role: Development Team Leader, Senior Java analyst/Developer

Project Management for both internal projects and business customers in many economic sectors. I introduced Agile and Devops methodologies in the company by training the staff and actively using the Scrum and Kanban frameworks in project management. In order to strengthen the staff, I'm in charge of developers hiring and, if necessary, of their training on the most used IT technologies. I use DevOps practices, and spread their use, in project management using tools such as Maven, Jenkins, XLDeploy, Jira & Confluence.
Project management, Development and Maintenance of the interface module for the Electronic Invoicing System of the entire Telecom Italia group (11 million invoices / month).

Technologies: Atlassian JIRA/Confluence, Java 1.7 e Scripting Linux, SpringBoot, Docker, Apache web server, HashiCorp Consul, Oracle DB 12g, Ant, Junit, Maven, SonarQube.

From 2001 to 2016	CERVED SPA

Role: Analyst/Java Developer

Development of calculation engines for the assignment of Credit Rating according to the specifications dictated by the Basel II legislation, Creation of web-based applications aimed at budget analysis. Drafting of reference documentation and installation of applications as well as deployment on the server, testing management and Customer Help Desk. I dealt with all the phases of the production process of the software lifecycle from installation and configuration of the server to the analysis and creation of software and database's schemas. I developed the customer's specifications and implemented software based on the Sun J2EE specification. I participated in the Agile pilot project that created the flagship application (CGS) for the group's online platform for determining credit rating according to the Basel II legislation using Java Spring Framework. Following the excellent result obtained, the entire IT sector (about 600 people) was converted to the Agile methodology.

Technologies: Atlassian JIRA/Confluence , HTML, XML, XSLT, Java 1.6 e JavaScript, Spring (core, integration, batch), Struts, IBM CTG, IBM WebSphere, MS SQLServer, Ant, EJB 2/3,Mybatis, Hibernate, Junit, Maven.

From 1997 to 2001	Telecom Italia SPA

Role: Maintenance Teams Manager/ PABX expert

Management of maintenance teams, telediagnosis / remote configuration of customer devices and ISDN / PSTN lines, Help Desk operator for technical support.

From 1995 to 1997	Valeo SPA

Role: Quality Assurance technician

Fabrizio Bertolami   February 2024

ISO-9000 Quality Assurance, Internal auditing, S.P.C. , Process Optimization Team Leader , Workforce Training in Quality and Process Control tools and methods.
